Abstract (en)

The mask includes a mask body and ear hook portions, constituting a pair, coupled to both end portions of the mask body in a left-and-right direction, wherein the ear hook portions, constituting the pair, are formed in a single sheet shape, and in a state before start of use, the ear hook portions, constituting the pair, are disposed to be superposed on the mask body so as not to protrude from the mask body at least in the left-and-right direction, the ear hook portion includes a stretchable member and a surface material coupled to at least one of surfaces of the stretchable member in such a state that the stretchable member is stretched at a predetermined rate with respect to a natural length, and each of the ear hook portions includes a high stretch portion that is easily stretched in the left-and-right direction and a low stretch portion that is not easily stretched in the left-and-right direction.
