Abstract (en)
[origin: WO2022029394A1] The invention relates to a kit for preparing a soaking medium in a seed priming treatment, comprising and configured for a combined application of at least two different agents, the agents being chosen from: a) one or more germination activators of the seeds, the concentration of the or each activator in the soaking medium being 0.01-10 mM; b) one or more agents capable of ensuring protection of the seeds and/or the plants originating from said seeds, the concentration in the soaking medium of the or each of the agents being 0.01-10 mM; and c) one or more regulators of the cellular oxidative mechanisms of the seeds.
