Abstract (en)

[origin: WO2022029407A1] A consumable configured to be fully inserted into an aerosol provision device. The consumable comprises an aerosol generating material for use in generating aerosol by an aerosol provision device; an insertion portion configured for insertion into an aerosol generation zone of the aerosol provision device; and a removal facilitator that extends away from or is located on a surface of the insertion portion and is configured to enhance gripping by a user of the consumable to assist in the removal of the insertion portion from the aerosol generation zone. Also provided is an aerosol provision device for use with such a consumable, and a method of removing such a consumable from an aerosol provision device.
