Abstract (en)

[origin: WO2022029259A1] Present invention relates to a cleaning tool (100) for cleaning an elongated heating chamber (210) of an aerosol generation device (200), for instance the heating chamber (210) comprises an elongated side wall (212), an end wall (214), and a protrusion (216) that protrudes from a central portion of the end wall (214) into the heating chamber (210), wherein the cleaning tool (100) comprises an elongated base (20) and a cleaning head (10), wherein the cleaning head (10) is electrically controlled, functionally connected to the elongated base (20), wherein the cleaning head (10) comprises at least a first-type brush (14) and a second-type brush (12). Present invention also relates to a kit comprising an aerosol generation device (200) and a cleaning tool (100) according to any one of the preceding claims.
