Abstract (en)
[origin: WO2022029391A1] The invention relates to a device (100) for cutting a tubular structure, which comprises: - a base (110) intended to be secured to the inside of a tubular structure, - a cover (120) secured to the base, - the base and the cover defining between them a blind inner peripheral housing (160), - a pyrotechnic charge (130) extending into the blind inner peripheral housing (160) and having an outer peripheral surface (130a), - a projection part (150) covering all or part of the outer peripheral surface (130a) of the pyrotechnic charge (130), - a pyrotechnic transmission line (140) connected to the pyrotechnic charge (130).
