Abstract (en)

[origin: WO2022029124A1] The invention relates to a fastening device (100) for fastening a mounting rail (200) to a wall (400), having at least one fastening element (101), which has a wall fastening portion (110) for fastening the fastening element (101) to the wall (400), and a mounting rail fastening portion (111) for fastening the fastening element (101) to the mounting rail (200), wherein the mounting rail fastening portion (111), when in the fastened state, is guided at least partially through an opening (211) formed in the mounting rail (200), and wherein the mounting rail fastening portion (111) has an undercut (112) into which a portion (210) of the mounting rail (200) is pushed when in the fastened state.
