Abstract (en)
Described are a machine for processing rod-shaped articles of the tobacco industry and a method for the off-line transfer of rod-shaped articles of the tobacco industry, implemented by the machine, wherein the machine comprises a succession of drums for transversely feeding an ordered succession of rod-shaped articles (100), at least one processing and/or inspection unit associated with at least one of the drums and a transfer unit (1) defining a first and a second feed path (P1, P2), which are separate from each other, and comprising a transverse feed channel (11) for one or more rod-shaped articles (100) and selecting means (50), disposed at the exit of the feed channel (11) and configured to direct each article (100) individually and controlledly towards the first or the second feed path (P1, P2).
