Abstract (en)
A toilet cover plate includes a cover plate body, including a channel and a body recess disposed on a top surface of the cover plate body and connected with the channel. The toilet cover plate also includes a flip cover disposed on the cover plate body and pivotally mounted in the body recess. When the flip cover is in an initial state, the flip cover is received in the body recess and covers an opening of the channel. The toilet cover plate also includes a holding mechanism disposed between the flip cover and the cover plate body and configured to keep the flip cover received in the body recess.
