Abstract (en)
[origin: US2023181985A1] The invention relates to a net holder (1) for a play net (23), comprising: an inner post (3) with a net mounting portion (19) designed for insertion into a net loop (24) of the play net (23), and a spindle (12) with an external thread; an at least substantially L-shaped body (2) with an outer post (5) and a cross bar (6), the outer post (5) being designed as a hollow box profile for receiving and guiding the inner post (3) and having a slot-shaped net passage (7), the cross bar (6) having at a free end a fastener for fastening to a playing table; and an adjuster (4) formed as a sleeve having an internal thread configured for engagement with the external thread of the spindle (12), wherein a retainer is provided for retaining the adjuster (4) with respect to a longitudinal position relative to the outer post (5) but allowing rotation of the adjuster (4); wherein at least one of the inner post (3) and the outer post (5) comprises a limiter for limiting a rotation of the inner post (3) in the outer post (5), which however allows a longitudinal displacement.
