Abstract (en)
[origin: EP4195186A1] This indicating device (20) includes a first light emitting element (31), a second light emitting element (32) capable of emitting light different in light emission color from light emitted from the first light emitting element (31), an indicating part (51) that is translucent and is irradiated with the light emitted from the first light emitting element (31) and the light emitted from the second light emitting element (32), and a partition wall (42) provided between the first light emitting element (31) and the second light emitting element (32) to define a first region (52) of the indicating part (51). A first distance between the partition wall (42) and the first light emitting element (31) is shorter than a second distance between the partition wall (42) and the second light emitting element (32). The indicating part (51) and partition wall (42) are arranged at a distance from each other.
