Abstract (en)

[origin: WO2022063988A1] The invention relates to a method for rearing a predator insect from the family Miridae or from the family Anthocoridae on a crop and to a method for controlling a pest in crop. The invention also relates to the use of an astigmatid mite for rearing a predator insect from the family Miridae or from the family Anthocoridae on a crop, to a composition comprising at least a breeding population of a predator insect from the family Miridae or from the family Anthocoridae and a first source of food for said predator insect, and to the use of this composition for controlling a pest in a plant.
