Abstract (en)  
[origin: GB2597977A] An assembly comprising a gemstone holder 130, a battery housing 320' and an LED, the gemstone holder comprising a bezel portion providing a mount for receiving a gemstone and a shaft portion 220 comprising an elongate shaft having first and second electrically conducting portions; the battery housing comprising a battery power source and a plurality of apertures, the first aperture enabling engagement of an end portion of the shaft with a first connector within the housing, and the second aperture enabling engagement of an end portion of the shaft with a second connector within the housing; where engagement of the shaft with the first connector completes an electrical circuit between the battery power source and the LED, whereas engagement of the end portion of the shaft with the second connector does not complete the electrical circuit. The assembly is preferably a stud for an ear piercing.
