Abstract (en)  
[origin: WO2022033863A1] A floor-treatment appliance comprises a chassis; a running gear, in order to guide the chassis over a floor; a treatment device for treating the floor; a suction mouth; and a guide for positioning the treatment device movably along a predetermined path in relation to the chassis. The path here extends in a vertical direction in relation to the floor and the path encloses a predefined angle with a plane parallel to the floor when the floor-treatment appliance is standing on a planar floor surface, wherein the angle is at most approximately 45°.
