Abstract (en)
[origin: WO2022025849A1] The present invention relates to a washing machine (1) comprising a body (2); a drum (3) wherein the laundry to be washed is loaded; a tub (4) wherein the washing process is performed; a housing (6) which is provided in the body (2), which opens into the tub (4) by means of a delivery line (10) and which receives a dispenser (6) suitable for loading cleaning agents therein; a filtering member (7) which is disposed into the housing (6) and which filters the water supplied thereon; a conveying line (8) which conveys the water taken from the tub (4); a supply line (9) which extends between the conveying line (8) and the filtering member (7) and which provides the delivery of the water coming from the conveying line (8) to the filtering member (7) to be filtered; a program selection controller (11) which provides the selection of one among a plurality of washing programs.
