Abstract (en)
[origin: WO2022038093A1] Disclosed is an additive manufacturing process for manufacturing a part having an at least partially or at least regionally porous material structure, in particular in the form of a filter element or filter device, the process comprising the steps of providing a starting material that is or can be rendered porous, applying said material that is or can be rendered porous, to form the part, and during the application step, adjusting the porosity of the starting material that is or can be rendered porous.
