Abstract (en)
[origin: WO2022034124A1] The invention relates to a workpiece processing installation for processing and/or producing a workpiece edge (48a-b) on a planar workpiece (40), comprising a detection device (38), which is controlled by an open-loop and closed-loop control device (36), for automatically detecting at least one property of a workpiece edge (48a-b). The detection device (38) has an image capturing device (52), wherein a visual axis (56a-b) of the image capturing device (52) is directed in the region of the workpiece edge (48a-b) to a region of the workpiece edge (48a-b) to be captured and is located at least approximately orthogonal to a plane (58) of the planar workpiece (40).
