Abstract (en)

[origin: WO2022033839A1] The present invention relates to an interior trim component or movement component for a timepiece or an item of jewellery, comprising a substrate (2) partially coated with a black layer (3) and decorated with at least one stone (4), the black layer (3) comprising carbon or aluminium oxide nanotubes, the substrate (2) at least lacking the black layer (3) on the portion facing the stone (4). The invention also relates to the method for manufacturing said timepiece component or jewellery component.
