Abstract (en)  
Holder (160) for supporting a vaporiser (132) in an aerosol delivery system (100), the holder comprising at least one holder inlet (134a, 14b); a holder outlet (164) for fluid communication with the vaporiser; and at least one air flow channel (162a, 162b) extending within the holder from the holder inlet to the holder outlet, wherein the at least one air flow channel comprises an undulating portion (169a, 169b) having an undulating lower surface (166a, 166b) comprising at least one trough (172a, 172b) for retaining leaked aerosol precursor from the vaporiser.
