Abstract (en)

A heat exchanger (20) has a plurality of plates (24) having opposed surfaces (30, 32) and side walls (36) extending beyond the opposed surfaces (30, 32) to a height; and a fin pack (26) extending from one opposed surface (30) toward an opposed surface (32) of an adjacent plate (24), and having a fin height, wherein the fin height is equal to or less than the height. The plates (24) can be stacked to form a heat exchanger assembly with a gap between adjacent fin packs (26, 28).
