Abstract (en)

[origin: WO2022050921A1] The invention is an element of air conditioning and ventilation system. The invention can be used in the entire health sector including, especially hospitals for air disinfection, especially in vitally important units for human health such as operating rooms and intensive care units. It can be used, apart from health, in shopping centers, congress centers, cinemas, cafes, restaurants, hotels, schools, theatres, indoor sport halls, skyscrapers, factories, public buildings, wedding halls and all workplaces requiring air conditioning. Also, it can be used in air-conditioners at homes, vacuum cleaners, air-conditioning systems or air-conditioners of cars and mass transportation vehicles. In summary, the invention has a wide range of usage potential including health, business and automotive sectors and private living spaces of individuals. In the other words, the filter can be used to exterminate many microorganisms such as bacteria, virus (especially COVID-19) and mould wherever it is used.
