Abstract (en)
[origin: WO2022038266A1] The invention relates to a coating apparatus which is in particular designed to coat narrow surfaces of a flat workpiece, and to a method. The coating apparatus comprises a first application device for applying a first coating material to a first narrow surface of the workpiece as well as a second application device for applying a second coating material to a second narrow surface of the workpiece. The coating apparatus further comprises a first printing device for printing the first coating material.
