Abstract (en)

[origin: WO2022043218A1] The invention relates to a sealing device (20) for an edge gap (16) between a planking part (12) of a drywall (10) and an adjacent floor (8), of a wall or a ceiling, having: - a single-piece main body (22) having a support portion (24), which forms a seat (36) for the peripheral side (18) of the planking part (12); - a contact portion (32) for contacting an edge (38) of an end face (40) of the planking part (12), which contact portion proceeds from the support portion (24) and protrudes in a first direction, at an angle to the support portion (24); and - a sealing portion (26), which proceeds from the support portion (24) and extends away from the support portion (24). The sealing portion (26) has two extensions (28, 30), which are spaced apart from each other and bridge the edge gap (16). The invention also relates to a drywall (10) comprising at least one planking part (12) and one sealing device (20) of this type.
