Abstract (en)  
[origin: WO2022033711A1] The invention relates to a bolt assembly (44) for fitting in a housing (14) of a handgun (10), having a bolt head (46) and a bolt carrier (48). The invention is distinguished by the fact that the bolt head (46) has a first control device and a second control device, wherein the first control device has at least one control stud (78, 78a, 78b) and the second control device has at least one control stud (79, 79a, 79b), wherein the first control device with the at least one control stud (78, 78a, 78b) is arranged at the front end of the bolt head (46) and the second control device with the at least one control stud (79, 79a, 79b) is arranged on the bolt head (46) just behind the first control device (78, 78a, 78b), and the at least one control stud (79, 79a, 79b) of the second control device is in operative connection with the bolt carrier (48), wherein the bolt head (46) and the first control device and the second control device are formed in one piece. The invention also relates to a handgun (10) having a housing (14), in particular having a lightweight housing (14) made of a thermoplastic and/or thermosetting matrix and reinforcing fibres, and having a barrel (34), wherein the bolt assembly (44) is arranged in the housing (14).
