Abstract (en)

[origin: WO2022037885A1] The invention relates to a method for monitoring a cooking process, wherein a movement of an object in the region of the cooking hob (3) is detected and the detected movement is evaluated for a predetermined period of time. The method is characterized in that an indicator for the development of smoke in the region of the cooking hob (3) is detected and evaluated and, in the absence of a movement for the predetermined period of time and in the presence of an indicator, a warning signal is output.
