Abstract (en)
[origin: WO2023030860A1] The invention relates to a battery tray, in particular a battery tray of a traction battery, wherein the battery tray has a bottom and at least four side walls, wherein the battery tray has an inner side and an outer side, wherein the battery tray has a hybrid design and is formed from an insertion part and a molding compound. The invention also relates to a traction battery comprising said battery tray and to a motor vehicle comprising said battery tray. The invention further relates to a tool for producing precisely this battery tray and to a method for producing the battery tray.
