Abstract (en)

[origin: WO2022039835A1] Various embodiments generally may relate to the field of wireless communications. For example, some embodiments may relate to enabling networks to provide a unique identifier for user equipments (UEs) that can be available to untrusted Application Functions and can be retrieved from an IP address, regardless of whether it is a Translated IP address or an Assigned IP address. Other embodiments may be disclosed and/or claimed.
