Abstract (en)
The present invention is directed to an adjustable fastening mechanism of a thermal evaporator for a light source shade, comprising a base (1) with an optional aperture (6) having fastening components (2) for attachment of the shade, the base (1) also comprising adjustable fastening components (7) for changing the distance of the dish of the thermal evaporator from the light source. The adjustable fastening components (7) are formed by at least two coulisses or sliders (7.1), each having a longitudinal groove (7.2) with a set of adjoining sloping grooves (7.3), and wherein a horizontally oriented adjustable dish holder (7.4) with at least two stones or studs (7.5) fitting into the sloping grooves (7.3) is located between the coulisses (7.1). The adjustable dish holder (7.4) has an operating handle (7.6). The fastening components (2) for attachment of the shade are length-adjustable telescopically with a spring. The fastening components (2) for attachment of the shade have terminal fastening elements (3), which may be hooks, clamps, screws, or magnets.
