Abstract (en)

[origin: WO2022043106A1] The invention relates to a compressed air filter (20) having a housing (22) and a housing head (26) with an inlet (30) and an outlet (34), wherein a preparation element (24) is arranged in an interior (42) of the housing (22), and compressed air which is to be prepared flows through the inlet (30) into said preparation element and flows out through the outlet (34) as prepared useful air. The housing head (26) has a through-opening (50) through which, in the state in which the preparation element (24) is used, there extends a functional element (54) connected to the preparation element (24).
