Abstract (en)
[origin: WO2022106518A1] The invention relates to a blade unit (01) for a wet razor, comprising a support frame (02) which has an inner face and an outer face oriented toward a shaving plane and in which a plurality of elongate blades (03) are located. The support frame (02) has two opposing side portions (07) which extend transversely with respect to the cutting edges (04) of the blades (03). A plurality of supports (09) extend in parallel with one another between the side portions (07), and a space (11) remains between each of the supports. Each of the blades (03) is attached to the inner face of the head portion (12) of one of the supports (09) so that the cutting edge (04) is located in the space (11). The invention also relates to a wet razor having a handle and a blade unit (01) fastened directly or indirectly thereto.
