Abstract (en)
[origin: WO2022043002A1] The present invention relates to a wiper system (100) for a glazed surface (211), comprising at least one main body (101) which comprises at least one wiper blade designed to come into contact with the glazed surface (211) and at least one on-board motor-driven member (120) for setting in motion that is configured to bring about a linear movement of the main body (101) along the glazed surface (211).
