Abstract (en)  
[origin: WO2022043378A1] In order to improve the performance of a parking operation for a cableway vehicle (7) of a cableway (1) in a parking area (P) of a cableway station (2) of the cableway (1), the invention provides a parking system (14) which comprises a conveying device (20) with a carrying-along element (24), which, while the parking operation is being performed, interacts with a component of the cableway vehicle (7) in order for the cableway vehicle (7) to be subjected to a conveying force (FF), by means of which the cableway vehicle (7) can be moved into a parking position in the parking area (P), wherein the conveying device (20) has a belt conveyor, preferably a toothed-belt conveyor (27), and wherein the carrying-along element (24) is arranged on a belt of the belt conveyor, preferably on a toothed belt of the toothed-belt conveyor (27).
