Abstract (en)  
[origin: WO2022043464A1] The invention relates to a temporary store for buffering and feeding piece goods-like foods from production to packaging by means of peripherally circulating product carrier baskets (1), consisting of an inlet region (3) and an outlet region (4) for the loading and unloading of the product carrier baskets and accumulating sections (2) connected therebetween for filled and emptied product carrier baskets. The accumulating sections are arranged on top of each other and overhead.
