Abstract (en)
[origin: WO2022043156A1] Described is a rafter connector (10), wherein: the rafter connector (10) extends in a longitudinal direction (L); the rafter connector (10) has a first fastening region (12) and a second fastening region (14) and a connection region (16); the first fastening region (12) is or can be fixed to a first rafter, in particular via a first mounting surface (13) with a normal (N13) advantageously parallel to a vertical direction (H); the second fastening region (14) is or can be fixed to a second rafter, in particular via a second mounting surface (15) with a normal (N15) advantageously parallel to the vertical direction (H); the connection region (16) is arranged between the first fastening region (12) and the second fastening region (14) in the longitudinal direction (L); and the connection region (16) has an internally hollow guide element (18).
