Abstract (en)
[origin: WO2022069199A1] The invention relates to a compact vacuum interrupter (1) having an insulator element (10), a moving contact connection (20), a fixed contact connection (30), a moving contact (40) and a fixed contact (50), wherein the moving contact (40) has a moving contact rod (410) and a moving contact contacting element (420), and the fixed contact (50) has a fixed contact rod (510) and a fixed contact contacting element (520), wherein the moving contact (40) is formed with a first material, and the fixed contact (50) is formed with a second material, the first material being mechanically stronger than the second material.
