Abstract (en)

[origin: WO2022069663A1] The invention relates to a housing (102) having a one-piece housing upper part (104) for a monitoring system (100) for monitoring the surroundings of the monitoring system (100), the housing having a first side wall (550) with a front side and a rear side, a second side wall, which is opposite the first side wall (550) and has a front side and a rear side, and a ceiling connecting the first side wall (550) and the second side wall. A guide device (744) is shaped so as to deflect an airflow (112), which flows along at least one of the side walls, at an angle of at least 45°, in particular at a right angle, and/or to guide an airflow between the front side and the rear side of the at least one side wall (550).
