Abstract (en)

Cooling device (10) comprising a body (11) defining a storage space and at least one control unit (20) for controlling an operation of the cooling device, provided on an outer wall surface (12) of the body (11) facing outside. The cooling device (10) further comprises at least one carrier tray (32) whereon the control unit (20) is positioned, and wherein the carrier tray (32) is configured to be movable between a closed position (II) in which the carrier tray (32) is positioned on the outer wall surface (12), and an open position (I) in which the carrier tray (32) at least partially extends outwardly from the body (11).
