Abstract (en)
[origin: CA3191552A1] The present invention relates to a roller (10) for the agricultural cultivation of soil, comprising at least one support unit (18) which is rotatably mounted about an axis of rotation and a plurality of mutually spaced compaction rings (24) arranged next to one another on the support unit and intermediate rings (26, 28) arranged between adjacent compaction rings (24). According to the invention, at least two intermediate rings (26, 28) have a different diameter and/or a different width.
