Abstract (en)

[origin: WO2022049434A1] It is described a door (10,10') for a refrigeration cabinet (1), comprising: a panel (35) of the insulating and optically transparent type, and a support frame (90) supporting and framing the panel, wherein the support frame is provided with an edging profile (100,105,110,115) extending longitudinally along a longitudinal axis and comprising a portion proximal to the panel (35) and a portion distal from the panel, wherein the distal portion comprises a convex outer surface (150) parallel to the longitudinal axis and directed with convexity to a direction opposite to the panel (35).
