Abstract (en)

[origin: WO2022048856A1] The invention relates to a hair care composition comprising: at least one multivalent alcohol, at least one polyethylene glycol, at least one monovalent alcohol, and at least one quaternary ammonium salt. The invention also relates to a method having the steps of: bringing the hair care composition into contact with preferably wet or humid hair of a person or animal, in particular long hair on the head of a person, optionally working and/or massaging in the composition in order to reinforce the contact thereof with the hair, optionally waiting a specified exposure time ranging from 1 second to 3 minutes, preferably 2 seconds to 1 minute, in particular 5 to 10 seconds, and rinsing the hair, preferably with an aqueous liquid, in particular water, in order to terminate or at least reduce further exposure to the hair care composition. The invention also relates to the use of the hair care composition in order to care for preferably wet or humid hair of a person or animal, in particular long hair on the head of a person.
