Abstract (en)

[origin: WO2023099051A1] The invention relates to a buckling stiffening ring (2) for stiffening a substantially cylindrical structure, in particular a tank (90), and to a method for stiffening a substantially cylindrical structure, in particular a tank. The buckling stiffening ring comprises a plurality of intermediate supports (231) which are connected by means of connecting elements and form a reinforcing ring (230), wherein a fitting piece and/or a variable connecting piece is located at least between two adjacent intermediate supports (231).
