Abstract (en)
[origin: CA3191950A1] Disclosed is a lifting machine (1) comprising a work platform (2), a mechanism (6) for lifting the work platform (2), and a control console (7) for controlling at least the lifting mechanism (6), the work platform (2) comprising a floor (3) and a guardrail (4) forming the longitudinal (41) and transverse (42) walls of an enclosure surrounding at least a part of the floor (3), the guardrail (4) comprising at least one top rail (5), referred to as a handrail, and the control console (7) comprising an attachment device (8) for removably coupling the control console (7) to the top rail (5). The top rail (5) is a rail with non-circular cross-section, and the control console (7) can be coupled to the top rail (5) by snap-fastening.
