Abstract (en)  
[origin: WO2022054024A1] In a transport container (1) for transporting temperature-sensitive transport material, having a container wall (2) which surrounds an interior (3) for receiving the transport material and has a plurality of walls (5, 6, 7, 8) which adjoin one another at an angle, wherein the container wall (2) is self-supporting and has an opening (4) for loading and unloading the interior (3), said opening being closable by means of a separate wall element (16), and wherein the container wall (2) encloses the interior (3) on all sides with the exception of the opening (4), the container wall (2) comprises an outer wall (9), an inner wall (10) spaced apart therefrom, and a vacuum chamber (11) formed between the outer and inner wall (9, 10), wherein the vacuum chamber (11) takes the form of a continuous vacuum chamber (11) that surrounds the interior (3) on all sides with the exception of the opening (4).
