Abstract (en)
[origin: WO2022053199A1] The invention concerns a decorative article produced from a cermet material comprising between 70% and 97% by weight of a ceramic phase and between 3% and 30% by weight of a metallic binder phase, the metallic binder comprising at least one element or alloy thereof selected from the list consisting of ruthenium, rhodium, palladium, osmium, iridium, platinum, gold and silver, the ceramic phase comprising a nitride phase and optionally an oxide and/or oxynitride phase, the nitride phase being present in an amount of between 70% and 97% of the total weight of the cermet material and the oxide and/or oxynitride phase in an amount of between 0 and 15%. The present invention also relates to a method for producing this article.
