Abstract (en)
[origin: WO2022053514A1] The invention relates to a method for selecting at least one dental product for a target consumer, said method comprising the following steps: a) acquiring, at an acquisition time and with an acquisition device, - at least one image representing, at least partially, a dental arch of the target consumer, referred to as "updated image" (Ia), and - optionally, first additional information (Ic1); b) analysing the updated image by a processing computer, so as to determine a value (V) for at least one dental attribute relating to the dental situation of the target consumer at the acquisition time; c) selecting, by the processing computer, as a function of said value, and optionally of said first additional information and optionally of second additional information (Ic2) stored, prior to step a), in a database (Consumers_DB), - at least one dental product in a database of dental products, referred to as "relevant dental product" (DP), and, preferably - at least one dental care professional in a database of dental care professionals, referred to as "relevant dental care professional" (DCP); d) presenting the target consumer with a response relative to said at least one relevant dental product and, preferably, to said at least one relevant dental professional, and/or - delivering said at least one relevant dental product to the target consumer, and/or - placing the target consumer in contact with a dental care professional selected in step c).
