Abstract (en)
Tactile guidance strip piece (1), which guidance strip piece comprises a guidance strip portion (2) with a lower fixing surface (4) and a connection portion (3) formed at least at one end of the guidance strip portion for connecting the guidance strip piece to another similar guidance strip piece, wherein the connection portion (3) has its lower surface at the same level than the lower fixing surface (4) of the guidance strip portion (2), and smaller height than the height of the guidance strip portion, and that the connection portion has a shape configured to allow insertion of a complementarily shaped connection portion of another guidance strip piece having same height and lower surface at the same level at least partially in the length of the connection portion for forming connected portion with the two connecting portions with uniform height.
