Abstract (en)
[origin: EP4213478A1] A vehicular display system includes: a first lamp that emits near-infrared light; a second lamp that emits visible light; a first camera that captures a first image of an outside of a vehicle irradiated by the first lamp; a second camera that includes an imaging range of the first camera and captures a second image of the outside of the vehicle irradiated by the second lamp; a control unit that generates a third image in which a luminance of pixels of the first image corresponding to pixels of the second image is reduced, based on a luminance of the second image; and a head-up display that displays the third image generated by the control unit.
