Abstract (en)  
[origin: WO2022058040A1] The invention relates to a massage device for treating human limbs, in particular for treating arms and legs, which device can be variably configured by simple device features and used directly by the user. The massage device (1) substantially comprises a frame (2), two threaded rods (3), and two transverse struts (4) having one or more massage elements (5), wherein at least one adjusting screw (7) is provided on each of the threaded rods (3) between the frame (2) and the transverse strut (4) and at least one spring (8) is provided on each of the threaded rods (3) between the adjusting screw (7) and a transverse strut (4). The struts (4) are movable along the threaded rods (3) via holders (6). Spacers (9) are preferably provided between the struts (4), and the threaded rods (3) can be detached from the frame (2) via fastening systems (15).
