Abstract (en)

[origin: WO2022089869A1] An automated device for storing a plurality of laboratory objects (20) comprises an access robot (30) for accessing the objects in storage locations (20) of a storage chamber (12). The access robot (30) has a carriage (32) that can be displaced horizontally and/or vertically in storage chamber (10). An object carrier (42) for accessing the storage locations (20) is arranged in the carriage. A camera (52) is located in the carriage (32) for viewing the storage locations (20) and the object carrier (42). The camera (52) pivots with the object carrier (42) and can be used to monitor the device and/or to adjust offsets stored in the control unit (66) of the device.
