Abstract (en)
[origin: WO2022125002A1] The invention relates to an oven comprising a cavity (30) provided inside an casing (10) and confining a cooking chamber (1), a front wall (40) having a frame (41) being formed from a one-piece metal sheet adapted to the casing (10) and surrounding the outer periphery (34) of the cavity (30), and a door (20) that is hinged from an inner pane (22) to the casing (10) sealing the outer periphery (34) in the closed position, and in such a way that abuts against the frame (41). The oven further comprises a bottom profile (42) with a drip collection channel (43) bent to extend forward under the inner pane (22) and formed in the depression structure on the upper part of the front wall (40) facing the inner pane (22) therein.
