Abstract (en)
[origin: WO2022060269A1] There is disclosed a method of operating a feedback radio node (10) in a wireless communication network, the method comprising transmitting acknowledgement signaling based on a received control information message, wherein the control information message comprises an anchor process indication indicating an anchor acknowledgement process, and/or wherein the control information message comprises a relative process indication indicating an acknowledgement process relative to an anchor process. The disclosure also pertains to related devices and methods.
